Experimental Neuropathology Services Policies and Procedures

User's guide to the SAIL Experimental Neuropathology Services

1) The SAIL Experimental Neuropathology Lab provides services to MNI investigators. Services may be provided to other groups and the interested investigators should contact Dr. Barry Bedell (SAIL Director) to discuss feasibility.

2) Download the Research Project Summary Form and appropriate Service Request Form(s).

3) Submit the duly completed Research Project Summary Form and Service Request Form(s) to Ming-Kai Ho (SAIL Research Assistant). You will then be contacted to discuss feasibility, scheduling and costs.

4) Investigators will be invoiced upon completion of the requested services or every three months should the study lasts longer than three months.

---

* **Any investigator and/or personnel from their lab who does not adhere to the policies and procedures cited above, or whose conduct is deemed unacceptable by the SAIL director will be precluded from performing further neuropathology studies at SAIL facilities.**
